

2023 SAMPLE CHARACTERISTICS

In 2023, 65 participants, recruited from Hobart, TAS were interviewed.

26 years 55%

The median age in 2023 was 26, and 55% identified as male.

In the 2023 sample, 37% were current students, 26% were employed full time and 28% were unemployed.

- Ecstasy
- Cocaine
- Other stimulants

Participants were recruited on the basis that they had consumed ecstasy and/or other illicit stimulants at least monthly in the past 6 months.

PAST 6 MONTH USE OF OTHER DRUGS

DRUG-RELATED HARMS AND RISKS

Among recent drivers, 40% reported driving a vehicle within 3 hours of consuming illicit drugs and 26% while over the legal limit of alcohol.

In the 2023 sample, 23% reported a non-fatal depressant overdose in the previous 12 months, and 23% reported a non-fatal stimulant overdose.

78% of the sample obtained an AUDIT score of eight or more, indicative of past year hazardous alcohol use (79% in 2022).

On the last occasion of ecstasy or related drug use, 74% used two or more drugs, 30% used both stimulants and depressants, and 17% used stimulants only.

OTHER BEHAVIOURS

In the total sample, 54% self reported a mental health issue and 20% had seen a mental health professional in the past 6 months.

Of those who commented, the three most common mental health issues reported were anxiety (68%), depression (53%) and PTSD (21%).

27% of the sample reported that they or someone else had tested the content and/or purity of their illicit drugs in Australia in the past year.

28% of the sample reported experiencing stigma because of their illicit drug use in the six months preceding interview, most commonly from police or a GP.

ECSTASY

Past 6 month use of ecstasy capsules, crystal, pills, and powder in 2023.

Of those who had recently consumed ecstasy, 17% used it weekly or more frequently.

Median amounts of ecstasy consumed in a 'typical' session using each form.

In 2023, more participants perceived the availability of ecstasy crystal, pills and capsules as 'easy' or 'very easy' relative to 2022.

METHAMPHETAMINE

Past 6 month use of any methamphetamine, crystal, powder and base in 2023.

Of those who had recently consumed methamphetamine, 31% used it weekly or more frequently.

100% of participants who had recently used crystal smoked it. Of those who had recently used powder, 53% snorted it.

Of those who could comment 94% perceived crystal methamphetamine to be 'easy' or 'very easy' to obtain.

COCAINE

Past 6 month use of any cocaine remained stable between 2022 and 2023.

Of participants who had consumed cocaine recently, few (n ≤ 5) reported weekly or more frequent use.

In 2023, the median price of a gram of cocaine was \$350.

Of those who could comment 68% perceived cocaine to be 'easy' or 'very easy' to obtain.

CANNABIS AND/OR CANNABINOID-RELATED PRODUCTS

Past 6 month use of non-prescribed cannabis and/or cannabinoid-related products remained stable between 2022 and 2023.

Of those who had consumed non-prescribed cannabis recently, 52% reported weekly or more frequent use.

Of participants who had consumed cannabis in the last 6 months, 92% had smoked it (42% swallowed and 12% vaped it).

Of those who could comment, all participants perceived both hydro and bush to be 'easy' or 'very easy' to obtain.
